

Help Protect the South Llano River by

STOPPING THE SPREAD OF INVASIVE PLANTS & PESTS

INVADERS OF TEXAS

A citizen scientist program to detect and report invasive plant species.

SENTINEL PEST NETWORK

Serve as a sentinel network to increase the probability of early detection of Emerald Ash Borer, Cactus Moth, Asian Longhorned Beetle, and other pests of regulatory significance.

This effort is associated with the development of the Upper Llano River Watershed Protection Plan

Local Host:

Presenters: Dr. Tom Arsuffi & Jessica Strickland

Date & Time: June 9th, 2012 (9am – 4pm)

Location: Llano River Field Station in Junction, TX

**HELLO INVASIVE SPECIES.
GOODBYE TEXAS.**
